EDUCATION

Óbuda University

Computer Engineering
2024 - Jelenleg

BMSZC Bolyai János Műszaki Technikum

Software Developer and Tester
2023 - 2024

BMSZC Bolyai János Műszaki Technikum

IT Systems Administrator
2019 - 2023

SKILLS

Frontend:

- React, Next.js, HTML, CSS, Javascript

Backend:

- Node.js, MySQL, PostgreSQL

Programming languages:

- C#, Java, Python

Other:

- .NET, Git, Github, Docker, MS Office

LANGUAGES

- English - intermediate
- Hungarian - native

OTHER

- B category drivers licence

ABOUT ME

I am a Junior Software Developer currently pursuing a degree in Computer Engineering at Óbuda University. I primarily focus on backend development, specializing in modern JavaScript-based technologies (Node.js) and the .NET C# ecosystem. My core expertise lies in designing and developing server-side systems, APIs, and databases. Having gained experience in an international environment, I actively work on personal projects to continuously refine and expand my skills.

WORK EXPERIENCE

Software Developer (Intern)

Library of Things – Barcelona, Spain

2024.03.03 - 2024.03.24

- Implemented multi-language support within React and Next.js environments.
- Localized user interfaces into multiple languages to improve global accessibility.
- Collaborated daily within a cross-functional development team.
- Utilized Git for efficient version control and team collaboration.

PROJECTS

Membership Registry

- Developed a comprehensive training and payment tracking system to manage martial arts classes.
- Backend Architecture: Designed and implemented a Node.js (Express) REST API with JWT-based authentication, and integrated a standalone Python Analytics Service.
- Frontend & Database: Built a responsive React client and utilized a structured SQLite database for secure management of student profiles and payment statuses.
- DevOps: Configured production-ready environments and build processes, ensuring secure management of environment variables (.env).
